Everything you Need to Know to Become an Amazon Top Reviewer

Once upon a time, Amazon allowed incentivized reviews, where customers were allowed to receive free or discounted products in exchange for posting their review.

However, as of 2016, Amazon discontinued this program, and prohibited this form of indirect payment. Instead, they reinstated their own program, called Amazon Vine, to better control the relationship between businesses and reviewers. They claimed it is their way of providing Amazon customers with "honest and unbiased feedback from their most trusted reviewers." They call these top reviewers "Vine Voices."

It's not all about the numbers. Writing thousands of reviews will do nothing for your ranking unless they are valuable to Amazon customers. For example, if you look at Amazon's Top Customer Reviewers, you'll see that the person in the 1 spot does not have the most reviews. They do, however, have an average of 100% in terms of helpfulness.

How recently was your review written?

Well, this should be obvious by now, but you need an Amazon account to start reviewing products. Follow the next steps to start working your way to the top.

We say start simple. Ask yourself what type of reviews you like. What do you like

about them? What are you responding to?

Amazon has a section titled "Customer questions & answers" right before the reviews begin. If you're wondering what to include in your review, start here. This is review gold - questions directly from the source. Including answers from some of the top questions in your review will resonate with customers.

I always look for photos or a video from customers that already have purchased the item I want. This is especially important when it comes to clothing, makeup, household items and anything where you are trying to match a color exactly. Customer photos, though not always pristine, show how the item exists in real life, without the help of Photoshop.
