One of the most important things to understand is how betting odds work and wha

t they mean.

If your odds are -200, you would need to bet \$200 to win \$100.

Multiply the \$10 by the numerator, which in this case is seven, then divide by

the denominator, which is four.

Underdog bets will have the numerator bigger than the denominator, as in the ex

amples above.

For example, it's fairly common to see American odds of -115, but that conv

erts to 20-23 in fractional odds.

70.

Typically you won't know the exact odds because sporting events aren't

that predictable, but this is a key principle to keep in mind when evaluating a

bet, especially on a moneyline.

Slingshot gives a percentage chance of an upset happening.

How did this happen?

They opposed the in-person sports betting measure because it contained a provis

ion that allowed private citizens to bring lawsuits to enforce gambling laws - s

omething they feared tribes would use to bring costly lawsuits against them.

And it's not clear that tribes... if they were to advance another proposal
